PLAINTIFF'S EXHIBIT

USG-1931

You design the interiors with hundreds of inspired colors and textures in vinyl prelaminated to wallboard by U.S.G.

You take the bows with TEXTONE* Vinyl-Surfaced Gypsum Panels. From our two-volume library you select VICRTEX*, VICRWALL*, and other durable vinyls to be prelaminated to fire-resistant gypsum wallboard. Thousands of design combinations will help you create any environment, capture any mood. These TEXTONE Panels enable you to decorate as you build. All panels are designed to work with USG* Demountable Partition Systems. Ask your U.S.G. man to see our coordinating Selector Library and our Demountable Systems.
