5400 West Harrison Street
Skokie, Illinois

PYDRAUL 625
(05-83)

Walter Schalk has done a good job in selling Pydraul 625 to the subject company. Only one point prevents his completing the sale, and that is an expression to the effect that Pydraul 625 is safe to handle with respect to toxicity level.

I will certainly appreciate your dropping a short note to Mr. Phillip Tatman at the above address with your comments on the safety of using Pydraul 625 as a fire resistant hydraulic fluid from the medical standpoint.

Thanks again for your cooperation.
