Mr. E. V. Koch, Inspector
Hartford Steam Boiler Insurance Co.
1217 Banker Road
Canutillo, Texas

Dear Sir:

We have this week installed in our mining and metallurgy laboratory an autoclave (stirred reactor) which includes a small one gallon pressure vessel designed for 1,200 psi @ 350°C. I believe that this should be added to our list of insured units.

I am enclosing the quotation and data sheet giving the information on the autoclave.

Please look this unit over on your next opportunity to visit our plant.

Very truly yours,

J. W. ENGLISH
