Monsanto

FROM (NAME—LOCATION—PHONE): R. C. Isham - B1ND

DATE: October 10, 1979 CC:

SUBJECT: PCBs -- LAFAYETTE, CO

REFERENCE:

TO: File

Called Wayne Darling (303) 665-9115 at 4:45 p.m. October 9.

Wayne Darling wanted to know:

1. If we were the guys who called him two years ago?
2. How dangerous are PCBs?
3. Do PCBs cause cancer or birth defects?
4. If soil samples are 1 ppm now, how does Mr. Darling know it wasn't higher years ago?
5. How and where do PCBs concentrate in the body?
6. Darling described sickness and miscarriages of pet cat and wanted to know if this was PCB related.
7. Claimed a Monsanto salesman he had talked with two years ago told him Therminol FR-1 was being sold only to the military.
8. Had questions of old and new Therminol designation series.

Offered to answer his additional questions; told him to call collect.
