POST OFFICE BOX 203 • HOUSTON, TEXAS 77001

March 12, 1970

Mr. Dale Smith
Monsanto Company
800 North Lindbergh Blouvard
St. Louis, Missouri 63166

Gentlemen:

We are attaching for your reference a letter from Monsanto Company and also an article in CHEMICAL WEEK regarding water pollution standards set by each state in the union.

We have been asked by Monsanto to supply all of our customers with an uptodate explanation as to how they are developing and testing new formulations to replace components in Pydraul products which will be equal in performance and have similar physical properties to eliminate the possibility of water pollution.

We might add that the only products we distribute for Monsanto are Phydraul AC, Pydraul 625, and Pydraul AC-Winter Grade #28.

If you have any additional questions regarding this matter, please do not hesitate to call upon us.

Yours very truly,

O. A. MAYBIN
