Greenbrier Clinic
White Sulphur Springs, We.V

Dr. Robert A. Kehoe, Director
Kettering Laboratory
University of Cincinnati
Cincinnati, Ohio

My dear Bob:

I see by the program that you are talking before the Lead Industries Association which is meeting at the Greenbrier on April 9th and 10th, and I am taking this method of calling your attention to the splendid clinic which is run in conjunction with the hotel.

The Clinic is purely for the purpose of making complete physical examinations. It has been in existence for some years and I happen to be a member of the Advisory Board and am therefore thoroughly aware of the facilities and can vouch for the staff. Dr. James P. Baker is Medical Director and is a qualified internist.

The Clinic has been examining the executives of numerous companies during the past few years and I am sure that with your knowledge of industry, you will agree with me that these examinations are extremely valuable in uncovering unsuspected early conditions and preserving the lives and health of executives.

I have written to many of the executives of the Lead Industries, informing them of the Clinic, because in addition to its excellent facilities and staff, I know of no more delightful spot to go and spend two or three days for an examination than at Greenbrier.

LE 00789

I think it would be well worth your while to contact Dr. Baker who would be delighted to show you the facilities right there in the Hotel and tell ou about the work they are doing. You might find this a useful place for some of the members of your industrial group or their families.

Best regards.

Sincerely

MEDICAL DIVISION
