Professor H. Van Genderen
Instituut Voor Veterinaire
Farmacologie en Toxicologie
Der Rijksuniversiteit te Utrecht
Biltstraat 172
Utrecht, The Netherlands

Dear Professor Van Genderen:

Dr. Bob Keller and I have tentative plans to visit the U. K. and the Continent again this spring and will probably be accompanied by Mr. William Papageorge who has been given the full time assignment of developing our continuing programs on the PCB's. If you, Professor Koeman and your other associates will be available, we would appreciate an opportunity to visit you in Utrecht early the week of May 10. We have to be in Brussels on Thursday, May 14.

We would like to bring you up-to-date on the status of our animal toxicity studies, the development of our analytical capabilities, and learn of any new data you have developed since we visited you last year. We have been informed by our associates in Brussels that you have continued your toxicological studies and we would be interested in any new data you have acquired.

As in the case last year, I am afraid this is rather short notice but our proposed trip has been postponed once this spring. I hope this time our plans to leave New York on April 30 will remain firm.

You may hear from our Mr. D. S. Cameron in our Brussels office as to more specific dates, depending on your availability.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health
