June, 1974

Papeteries Bollore S.A.
83 Boulevard Exelmans,
75781 Paris, 16.

Gentlemen,

Impregnant for Metallized Paper Capacitors

Some time ago Monsanto Industrial Chemicals Company (Monsanto)supplied to Peter Schweitzer Paper Co. (Schweitzer) of (address) a sample of an experimental fluid identified as MCS 1475 for evaluation by Schweitzer as an impregnant for metallized paper capacitors. We understand from Peter Schweitzer that you wish to carry out your own evaluation of the fluid

We understand that you, being associates of Schweitzer, have received from Schweitzer the results of their tests on MCS 1475, and that Schweitzer have requested Monsanto to supply you with a sample of MCS 1475 for you to carry out your own evaluation.

Accordingly this letter outlines the terms and conditions under which Monsanto will supply a sample of approximately 18 litres of MCS 1475 to Papeteries Bollore S.A. (Bollore).

Bollore agrees:

(i) that the sample will be used by Bollore only (a) for the experimental production of metallized paper impregnated with MCS 1475 to enable Bollore to assess the suitability of the metallized paper so impregnated for use in electrical capacitors, and (b) in such ancilliary tests or experiments on the electrical properties of MCS 1475 or on paper impregnated with MCS 1475 as may reasonably be required to complete the assessment of the aforesaid metallized paper, but for no other purpose;

PCB-ARCH0743361

(ii) that neither the sample nor any part of the sample, in the form of the liquid as received from Monsanto, in the form of metallized paper impregnated with MCS 1475 or in any other form will be sold, given or otherwise transferred into the possession of a third party;
(iii) not to analyse or have analysed the sample with a view to discovering the chemical nature of MCS 1475;
(iv) not to disclose to any third party ~~with the exception of Schweitzer~~ during a period of 5 years from the date hereof

(a) that Monsanto has supplied a sample of MCS 1475 to Bollore
(b) except with Monsanto's written permission, the results of Bollore's evaluation of metallized paper impregnated with MCS 1475 or the results of any ancilliary tests or experiments carried out by Bollore in connection therewith;

(v) to begin an evaluation of MCS 1475 as an impregnant for metallized paper for use in electrical capacitors within a period of six months from the date hereof and to report to Monsanto the results of all evaluations tests and experiments carried out by Bollore using MCS 1475 within one month of such results becoming known to Bollore;
(vi) if requested by Monsanto, to return to Monsanto any balance of the sample of MCS 1475 remaining (a) when Bollore reports to Monsanto that it considers its evaluation is complete or (b) at any time after two years from the date when the sample is received by Bollore.

If the foregoing terms and conditions meet with the understanding and approval of Bollore, please show the acceptance and agreement of Bollore by having an authorised representative of Bollore execute this letter in duplicate at the place indicated below and return one of the executed duplicates to us.

Yours truly,
Monsanto Industrial Chemicals Company
