LABELING FILE

This memo confirms conversation with Dr. Hunt in the Medical Department regarding physiological hazards.

The oral lethal dose on rats is 10,400 mg. per kilo. The product is practically nontoxic.

Skin absorption on rabbits mildly toxic, greater than 1,260 mg. less than 2,000 mg. per kilo.

Skin irritation 2.6 out of 8.

Eye irritation 16 out of 110.

Vapor nontoxic at ambient temperatures.

This product contains Aroclor 1242.

This product will not be sold domestically as a hydraulic fluid. It is intended to compete with similar PCB materials where they are not restricted by government regulations.

The label should include:

1) The standard "Contains Chlorinated Hydrocarbons" paragraphs.

2) It should also include the environmental statement regarding PCB contamination.
