Northwinds Abatement, Inc. (NAI), an industrial-commercial asbestos abatement contractor, provides state-of-the-art asbestos hazard abatement throughout the United States.

NAI's management and staff realize the need for an organization that combines years of experience in commercial construction, along with petrochemical service. This combination forms a company capable of meeting the industry's need for asbestos abatement in a safe, economic, and efficient manner. All of NAI's directors, management, and marketing personnel are certified by the Environmental Protection Agency as "Competent Persons" trained in "Supervision Procedures and Practices for Asbestos Abatement Projects". In fact, NAI's management has testified to the Texas Senate on the current asbestos situation with recommendations for more stringent standards regarding contractor qualifications and worker training.

NAI leads the others by offering you:

- \$1 million on-shore "occurrence form" liability protection (Greater excess form available on a per job basis)
- Financial stability to perform as a general or subcontractor.
- Multi-million dollar bonding capacity.
- Supervision, experienced and well qualified in industrial asbestos removal.
- All projects monitored by a third party non-bias hygiene firm.
- Fortune 100 and government references provided on request.

Mike Martin, the NAI Business Development Manager, is your contact to answer questions or to provide you with a realistic bid for your up-coming projects.

NAI is on call 24 hours a day, via our Houston number, with readily available labor, materials, and "competent persons". Our staff guarantees your needs are met to your satisfaction. As a leader in the industry, NAI goes that extra step to assure customer satisfaction.
