SUBJECT: AROCLOR

DEPARTMENT:

TO: FILE

I received a call from James Klohr of ElCamino Machinery Movers, in Los Angeles. He stated ten days ago he was moving a vacuum tank at TRW and contacted Aroclor on his face and hands and has had a blister ever since. There are three other people also with similar troubles. I told him that it probably would get over in a short time and to use any mild ointment, even Noxzema, but if it did not clear up quite shortly to go back to his dermatologist.
