brush it out because the dust is bad.

Did I read that correctly?

A That is what it says. That is what it says.

Q Down the bottom, under general conclusions, it says none of our contact felt that air blowout is a necessity. All realize there is some degree of health ramifications involved.

Did I read that correctly?

A Yes, you read it correctly.

Q I don't want to ask you about this; I don't want to get bogged down in details.

I also understand that Ford had a conference on friction product exposures in Great Britain in 1969; is that correct?

A 1969 there was a conference. I don't think Ford Motor Company was the only one, but that is where the Hackish and Knight and Knight and Hackish papers were presented, and there was a conference, yes.

Q In fact, the conference was a conference on exposure to asbestos during brake and clutch
