Mr. M. Dorais
Mr. M. Prus
Mr. M. J. Messel
Mr. W. W. Oughtred

Gentlemen:

Canadian Johns-Manville Co., Limited and Advocate Mines Limited are increasing the size of the warning label on the bags, as shown on the attached replica. The transition will be gradual as we work off existing bag inventories. Please note that the wording has not been changed.

Yours truly,

Attach.

Subject: LABEL - ASBESTOS FIBER SHIPPING BAG

One of the first assignments given to the Labeling Review Committee was to determine the suitability of the present warning labels used with asbestos fiber and asbestos fiber containing products.

This assignment has been completed and it is the unanimous opinion of the committee that the present label on the asbestos fiber shipping bags is inadequate because of its size which limits the legibility. It is the recommendation of the committee that the size of this label be increased to duplicate the asbestos portion of the warning label now being used on our DESERTALC products. A copy of this label with type sizes is attached. The label as shown on the sample should have an inked border.

I would appreciate your comments.
