Dr. Carl D. Bohl
Monsanto Co.
Corporate Medical Department
800 N. Lindbergh Blvd.
St. Louis, Mo. 63166

Dear Carl:

Thanks so much for the PCB analysis. States starting to crack down but most of our plants I am told are about 1/10 of the proposed 280 ug/l standard. We have had to rely on what the various States have told us.

The biphenyl burn victim is doing well, infact, he is discharged from the hospital. He had second degree on a 2 - 3 inch strip from neck to belt plus on one elbow. Attending M. D. said he would call if SMA 12 showed abnormal liver enzymes, no call.

See you in Maimi. Doug Gray's contract expires in August at Northwestern. Know anyone looking for a Ph. D. industrial hygienist?

Sincerely,

John D. Neefus
Corporate Industrial Hygienist
