Subject: Grace - South Carolina Vermiculite

Date: September 6, 1977

W. R. Grace has finally agreed to once again furnish vermiculite out of South Carolina on a regular basis. This will be up to 2,000 tons per year. Before we start scheduling vermiculite from South Carolina on a regular basis, I have requested that they ship one car for our review, to see if there has been any changes in the product since the last time we brought the product in. Therefore, early week of September 4, one (1) car of vermiculite will be shipped from South Carolina for this purpose. They will call me Tuesday, September 6, as to the actual shipping date planned. Research will also want to sample this car thoroughly. Therefore, it is important that we keep everyone in tune as to its arrival.
