Mr. Smith and I will do that.

(Whereupon, the documents were published to the jury via the overhead projector.)

MR. IGNATOWSKI: Mr. Smith, is this the corrected version?

MR. SMITH: It is.

MR. IGNATOWSKI: Your Honor, this is the document that we showed the other day that was retyped that Ms. Tostanoski was unsure about.

We showed her a copy of the retyped version, and it is now agreed that it is correct.

Is that correct, Ms. Tostanoski?

MS. TOSTANOSKI: That is correct.

MR. IGNATOWSKI: The interim report regarding the biological activity of Kaylo dust.

This is our Exhibit OI-26.

It is to the Illinois Glass Company, Toledo, Ohio, by the Saranac Laboratory, Saranac Lake, New York, October 30th, 1948, submitted by Dr. Vorwald, director to the Trudeau Foundation.

THE COURT: That is admitted in evidence.
