PLAINTIFF'S EXHIBIT

UC-P-9

Records are to be maintained for all employees assigned to work in the restricted area. This doesn't mean all employees in the plant, but it does require medical tests of all employees regularly assigned in the hazardous area to be sure exposure is negative.

Paragraph No. 11 is intended to stop sale of carcinogenic materials to customers who do not understand the hazard and are not capable of protecting against the hazard.

Because of work done by the Corporation in the past, I do not believe we have a serious problem with regard to carcinogens. There are several areas of concern, however, and the policy statement should help us resolve those problems and provide guidance in our handling of new products in the future.

Please let me know if there are any further questions which I might answer. If the comments clarify the concerns expressed at the meeting, I would appreciate an endorsement of the policy from the Production Office.

R. E. Graebert
