Jack T. Garrett
Manager, Industrial Hygiene
Monsanto Company
800 N. Lindbergh Boulevard
St. Louis, Missouri 63166

Dear Mr. Garrett:

In your letter of November 19, 1969, you indicate that you are sending a chart showing the physical and chemical characteristics of Aroclor 1254 and 1262 as well as the acute mammalian toxicity orally and by skin.

Since this has not arrived, I presume that by oversight it was not mailed. This information would be much appreciated and thank you for your help.

Sincerely,

Robert B. Dahlgren
Assistant Leader
