

0875-96-202 General

June 12, 1936.

Mr. W.T. Kelley,
 Chief Counsel,
 Federal Trade Commission,
 Washington, D.C.

Dear Sir:

Receipt is acknowledged of your letter of June 9, referring to Public Health Bulletin No. 163 containing the report of the committee regarding the use of tetraethyl lead gasoline motorfuel, and requesting the address of each member of the committee and a statement as to whether any of them are in the Government service.

I am enclosing a list of the seven members of the committee and their present addresses. The first five members on the list are at present consultants of the Public Health Service. All of the committee members named held appointments with the Service as consultants at the time of their study of the tetraethyl lead problem and their report to the Surgeon General.

Very truly yours,

Olson
 Acting Surgeon General
