Mr. David K. Sugar
President
Vacuum Metallizing Limited
22 Carnforth Road
Toronto 16, Canada

Dear Mr. Sugar:

Thank you for your letter of October 12, 1971 concerning the disposal problems of used Santovac 2. In general, burial of the PCBs is not too satisfactory since they are persistent and may eventually find their way into underground waterways and enter the food chain. I am sending a copy of your letter to Monsanto Canada Ltd. for comments. Someone from this group may contact you directly since I understand that proper disposal facilities are available in Canada.

With regard to replacement products for Santovac 2, we feel that the pump supplier is in the best position to recommend the product best suited to your application. We have not found a direct replacement in our line of products.

Please let us know if we can provide further information.

Very truly yours,

R. E. Hatton
Technical Manager
Hydraulics and Lubricants
