Your Memo of October 10, 1967

R. P. Sullivan
WILMINGTON

One M centipoise fluids difficult to find in Monsanto. THERMINOL FR-3 or Aroclor 1260 come close. FR-3 reaches 1 M CP @ 60°F., and 1260 reaches 1M CP @ 100°F.

May I suggest the silicone fluids from Dow Corning which may achieve 1 M CP viscosity at room temperature.
