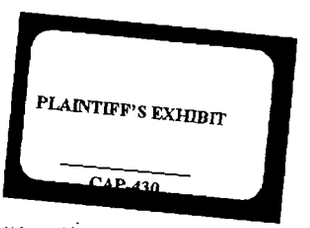
CAPCO,
Cement, Asbestos Products Company,
2144 Highland Avenue South,
P. O. Box 3435,
Birmingham,
Alabama 35209,
U.S.A.



Dear Mr Alpine,

Thank you for your letter dated 3rd May 1976 and the interest you have expressed in our automatic bag-slitting machine.

For your general information, the machine was specifically developed to open automatically pressure and none pressure packed asbestos fibres in an enclosed environment.

The machine can open all types of bag materials, multi-walled paper sacks, plastic or poly-woven bags, jute (hessian) sacks and bags with loose plastic liners.

I enclose a catalogue, general method of operation sheet and representative reference list of users and purchasers. We have received orders from Dow Chemical, U.S.A. for one machine and General Motors Overseas Operations, New York, for three machines following visits to Johnsonville, Canada.

In answer to your questions:-

A. Capabilities. I have previously stated the machine can open all types of asbestos bag products, various bags can be placed on a conveyor feed belt according to blend being mixed, with one main exception, grade 3 pressure packed amosite, if wet, can take up to 3½ - 4 minutes to pass through the machine. On receipt of a list of types and grades of asbestos fibre used, I will be able to confirm the recommended through-put rates.

B.C.E.-

D. We do not consider there are many components, but recommend the following. (See attached spare parts price list.)

When ordering, please state quotation reference.

The above quotation is subject to our conditions of sale and contract, and is to remain firm for a period of 30 days from the receipt of our quotation, and should an order be placed outside this period, or for delivery greater than five months from the date of the quotation, then we reserve the right to invoice in accordance with the conditions ruling at the time of delivery.

I trust the foregoing is of interest to you. If there is any further information you require, please do not hesitate to contact us. We remain,

Yours faithfully,

J. H. Wright.
Managing Director.

NOTE: Bel-Tyne Company, Ltd. is the only vendor that makes the asbestos bag opener.
