Spick and span or shabby-which?

A paint-worn, "rusty" house is an eyesore to any neighborhood. You can make your home spick and span—truly a delight to the eye—by the judicious use of B-H Paints.

Paints of real character—permanent preservatives for woodwork of all sorts—a sure insurance against decay.

A little higher in price than the cheap kinds, but B-H Paints last twice as long so are far more economical in the end.

lift and full bulbs later in the season and equally useful in digging them out.

There are little hand rakes which are just the thing for hand cultivation among plants which need special care and the earth kept stirred.

Sprinkling cans and sprays must be added to every well regulated garden outfit, especially a spray.

While looking over spraying outfits get in a supply of poison for the pests that devour and for the fungus that blights. The gardeners will tell you what to get. Hardware mixture for fungus pests, paris green or some other arsenical poison for those that eat the leaves, and a tobacco poison of some kind for plant lice are standard. Often they can be bought in combination.—National Garden Bureau.

FRESH VEGETABLES EVERY DAY

What is a back yard good for? It may be made to supply the average family with fresh vegetables through the growing season.

WATCH FOR INFERTILE EGGS

In Hatching Poultrymen Have No Set Rule to Follow in Operating His Incubator.

Poultrymen should test their eggs before putting them under a hen or in an incubator and take out all eggs which are unlikely to produce good chicks. It is not inferred, however, that infertile eggs may be selected out for incubation. There is on record several cases by operators of determining whether an egg is fertile or infertile

chairman of the voting board, in order that I might be able to help the grower, but that position is long dead. I am entitled to be a humble grower member of the voting board."

The judge then forwarded his application as a voting board member, stating that he left the meeting last September on a matter of principle and declaring that he believed that it was his action then that brought him to a no-o load. The judge stated that a questionaire sent out by him last year showed that it was costing between, as a cooperative association, to market the crops "21 cent 21 per cent [illegible] per lb. per cr." the judge said.

Judge Bradley of Morgan Hill spoke at length on the contested wording of the Morgan Hill Growers' Rules. "The Morgan Hill section was formed last summer during the voting board election, when it became necessary to decide who should represent the growers on the association voting board," Judge Bradley stated. "The judge went on to explain how the act was made to enhance to remedy certain conditions and to prevent them from occurring again. The rules at Morgan Hill succeeded, the judge said, despite the forming of the members believed, "Hundreds of millions of dollars handled by the association," declared Judge Bradley, "and heretofore the growers have had no case of expressing themselves. How Sportsmen looked with indifference on the growers at the voting but failed to use but a handful of growers members from Morgan Hill, and of course members by the valley, attended to see that the voting board members, sent by mail, were counted right."
