Suits You Best.

SWRf/Asbestos 6860

KleenGuard® Comfort That Protects

COVERALLS

For protection in utilities.

KLEENGUARD® Coveralls are made of a unique fabric that combines the protective qualities of disposables with the breathability of woven cloth. This durable three-layer material repels many water-based liquids and filters out many particles. Yet it allows air and moisture vapor to pass through to increase worker comfort and help improve productivity. Independent laboratory testing suggests that, depending on environmental conditions, workers wearing KLEENGUARD® Coveralls may be able to work longer and remain significantly cooler than workers wearing spunbonded polyethylene coveralls.

- Holds out many particles and aqueous liquids.
- Breathable fabric for greater worker comfort.
- Designed for freedom of movement without ripping.
- Heavy-duty fabric for durability.
- Consistent sizing from order to order.

See reverse side for product data.

Satisfaction Guarantee

If, for any reason, you are not satisfied with KLEENGUARD® Coveralls, just state your reasons for dissatisfaction on your invoice and return it within 90 days of purchase to:
Kimberly-Clark Corporation
Customer Service Department
Service and Industrial Sector
1400 Holcomb Bridge Road
Roswell, GA 30076

The full purchase price of your order will be immediately refunded. This offer is limited to five cases or $400, whichever is less.

As with cloth, do not use near an open flame. Melting will occur at temperatures higher than 300°F.

Although the fabric used in KLEENGUARD® Coveralls is an effective barrier to many liquids, chemicals and particles, Kimberly-Clark makes no warranty with respect to the suitability of the garment or fabric for specific applications. We recommend that the end-user determine such suitability for any specific use.

Caution: Exercise care when boot covers are worn while walking on slippery floors or surfaces.

KleenGuard® Comfort That Protects

LIMITED USE COVERALLS

For short-term use in asbestos removal.

For quick tasks that don't require the durability and protection of regular KLEENGUARD® Coveralls, we now offer an economy version: KLEENGUARD® Limited Use Coveralls. We've made them affordable for short-term use. With a lighter fabric that offers good protection for short workshifts. And without features such as pockets and elastic.

- Economically priced for short-term use.
- Fabric breathes like cloth, keeps workers cooler.
- Filters out many particles, resists aqueous liquids.

See reverse side for product data.

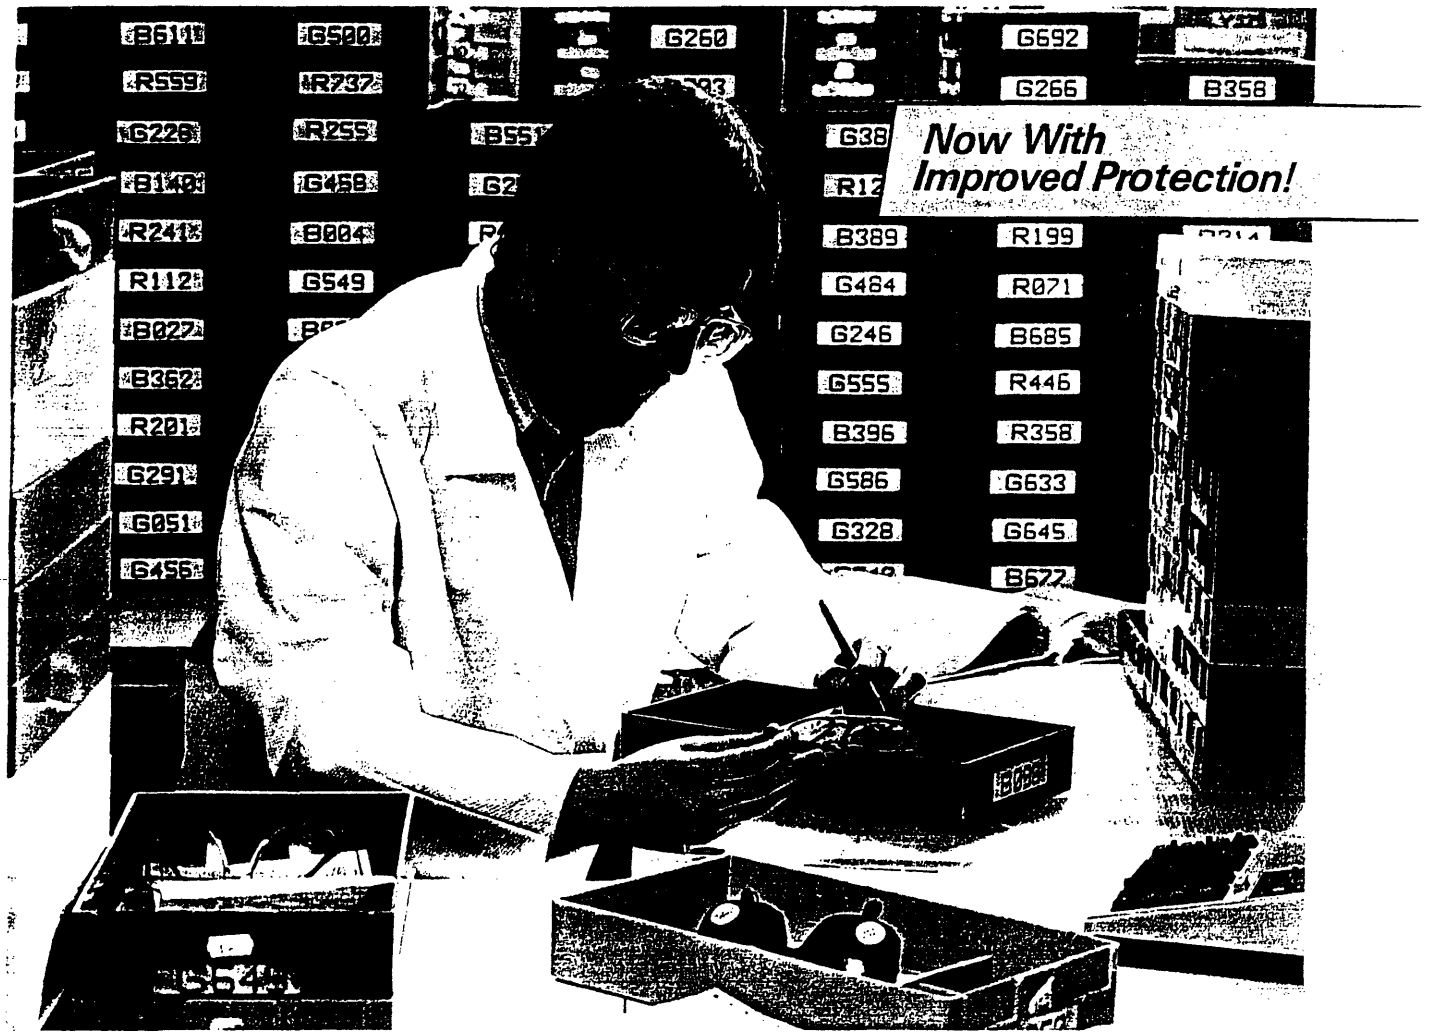
KleenGuard® Comfort That Protects

LAB COATS



In inspection areas.

KLEENGUARD® Lab Coats from Kimberly-Clark are now made with the same three-ply fabric as our KLEENGUARD® Coveralls. They're more protective than ever before. Yet, KLEENGUARD Lab Coats still offer the breathability of cloth—workers stay cooler, more comfortable. They're low in lint for use in lab or inspection areas. And tough enough for light manufacturing applications.

- Durable fabric protects clothes; is low in lint.
- Breathes like cloth, keeps workers cooler.
- Tailored for better fit; with convenient pockets.
- Disposable and economical to use.

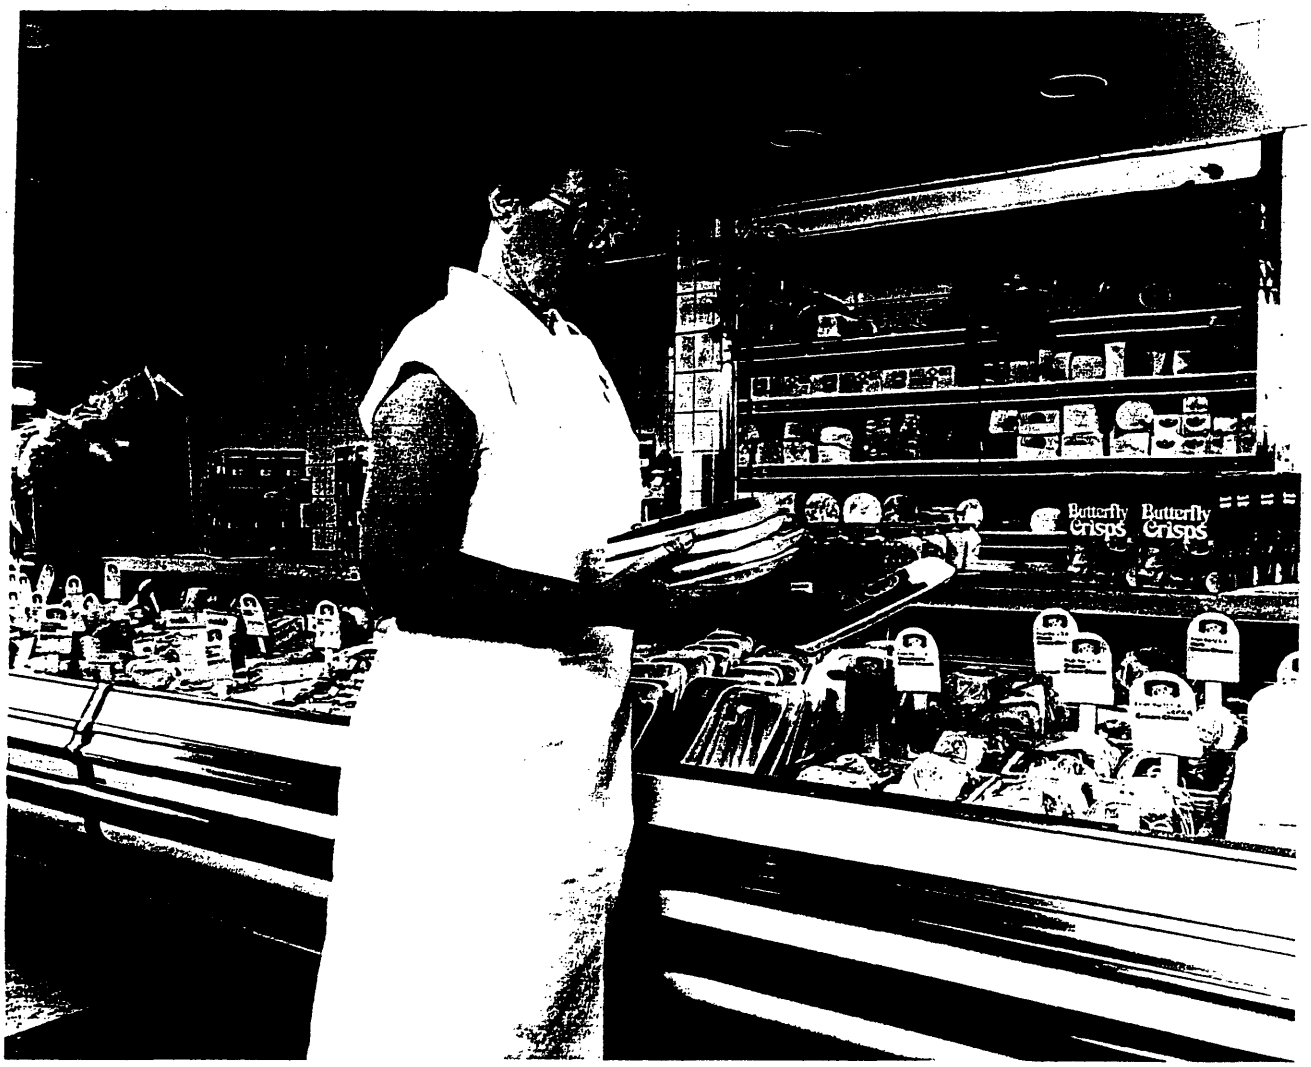
KleenGuard® APRONS

Comfort That Protects



KLEENGUARD® Aprons from Kimberly-Clark are now better than ever. They're made of a lighter, more pliable fabric for greater breathability and comfort. Yet, they protect against water-based liquids better than ever before. Our 3-layer fabric has a new inner layer that's even more resistant to aqueous liquids. Ideal for food-processing or handling—stain-resistant KLEENGUARD Aprons arrive clean and fresh every time.

- Improved fabric for greater comfort.
- Resists stains, water-based liquids.
- Disposable; eliminates laundry, rental costs.
- Always fresh and clean.

KleenGuard™ UNDERGARMENTS

Comfort That Protects

New KLEENGUARD™ Disposable Undergarments give workers the combination of physical comfort and modesty they want while wearing disposable coveralls. Unlike other disposable garments that can be hot, stiff and uncomfortable, KLEENGUARD™ Undergarments are made of our breathable three-layer fabric, which allows cooling air to pass through and has a cloth-like feel. And KLEENGUARD™ Undergarments offer the convenience of disposable clothing for both men and women.

- Opaque, comfortable fabric for worker modesty.
- Fabric breathes for greater comfort, productivity.
- Generous sizing for freedom of movement.
- Disposable garments for men and women.

Is It Too Much To Expect Protection *And* Comfort From Disposable Garments?

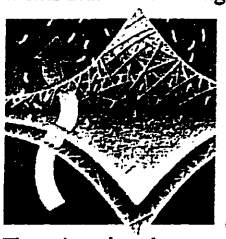
With KLEENGUARD® Workwear you can expect both

Most disposable work garments make you give up comfort to get protection. That leaves your workers sweaty... uncomfortable...and less productive.

That's why Kimberly-Clark invented KLEENGUARD® Workwear—made from an exceptional fabric that gives you both protection and comfort for your workers.

Unique three-layer fabric helps workers be more productive

The two *outer* layers are constructed of long-tough filaments that resist tearing and abrasion.



The unique three-layer fabric in KLEENGUARD Workwear offers both protection and comfort.

The *inner* layer is fabricated of an intricate matrix of microfibers that offers protection against many particulates, dusts, and liquids... yet also allows air and perspiration to pass through.

No other disposable garment that offers this kind of protection can offer this kind of comfort. When your workers are comfortable, they are more productive.

Full line of industrial clothing for your workers

KLEENGUARD Coveralls have *triple-stitched seams* for strength, and *elastic back and wrists*—for a tapered fit that reduces snagging and ripping. In fact, our studies show that KLEENGUARD Coveralls have stronger seams and *150 percent more tear strength* than a typical coverall made from TYVEK* material. This durability means less garment changes and more productivity from your workers.

KLEENGUARD Lab Coats feature plastic snaps in front, a full cut, plus body and pencil pockets.

KLEENGUARD Aprons, made of the same protective, yet breathable fabric, feature convenient, extra-long ties.

We manufacture these exceptional garments at our own state-of-the-art facilities, ensuring uniform sizing and construction quality. Three durable layers. Two functions—protection *and* comfort. It all leads to one obvious conclusion—with the Kimberly-Clark line of breathable garments, protection's no sweat.
