INTER-OFFICE COMMUNICATION

FROM: John Darmstedter	OFFICE: Akron, N. Y.
➡ TO: Mr. W. N. Gettel	OFFICE: Tigard, Ore.
SUBJECT: Amsco Resin Representatives	DATE: March 25, 1976

MESSAGE:

Bill - Had three representatives of the Amsco Co. call on us today, and they droppe off a sample of Asbestos Free Ready Mix that I thought you'd be interested in.

The resin used appears to be a Styrene - Butadiend , but I seem to smell a little Ammonia too. I siced these people on to you; told them we had no part in the formul of the Ready Mixes or any other product.

Anyway, I assume that Amsco will be calling on you in regard to the 4170 Resin we ha hand. I told them that the material did not work well in ~~obe~~ formulation we tried it that it did not have the cold bonding properties we desired. I told them we had not used the material since our initial trial.

SIGNED: Regards - John Darmstedter
