JOB THERMINOL "SPACE HEATING"

BOOKLET: PCB Copy

(Sub-heading under "THERMINOL FR SAFETY OF HANDLING" Section)

Environmental Considerations

Therminol FR is a stable, long-lasting chemical. Consequently, measures to avoid environmental contamination through spillage, leakage, or careless disposal should be observed.

Therminol FR heat transfer fluids contain polychlorinated biphenyls (PCB). PCB residues in small amounts have been found in the environment, and some studies indicate that they may be harmful to certain forms of animal life. Every care should be taken by users of Therminol FR fluids, or any other PCB-containing products, to prevent entry into the environment through spills, leaks, disposal, vaporization or everyday use and handling.
