SUBJECT Bio-Test Reports on Aroclor 1221, Aroclor 1542 and MCS 1016

REFERENCE

TO W. B. Papageorge
WPAPA

Attached is a copy of the report from Bio-Test on the acute toxicity studies for subject samples.

I believe the data are in line with what we would have expected. You will recall the studies were also required to obtain some idea of the levels to be used in 90-day studies.
