Nashville, TN 37232

Dear Ray:

Enclosed are copies of the report and supplement to the monkey reproduction study conducted with a polychlorinated biphenyl by Litton-Bionetics. As I mentioned during our telephone conversation, I would like you to review it critically, to meet with us at Monsanto to discuss your reaction to it, and after we have had our discussion, to meet with us and Litton personnel to work up a final report.

It would be appreciated if you would let me know when you anticipate completing your review of the reports and could come to St. Louis. I would like a few alternate dates, as soon as you can select them, so I can check the schedules of others who will be involved.

I look forward to hearing from you and working with you on this report.

Cordially,

George
George J. Levinson
Director, Environ-
and Toxicology
