Mr. W. B. Papageorge - B2NK

An Associated Press wire story carried details of the Holly Farms lawsuit against Monsanto and four other defendants. The story was prompted by transfer of the case from a county court to the U.S. District Court in Greensboro, N.C. Only four clippings have arrived so far.

Chemical & Engineering News published a PCB round-up article which repeated old charges of birth defects, by association, and other unsubstantiated claims.

A PCB write-up for Monsanto's corporate pollution booklet was prepared and approved.
