Subject: EMISSION RECOVERY SYSTEM LEVEL GAUGE VALVES

Attached is the revised Class "A" Design for the Emission Recovery System Level Gauge Valves. This design will provide a means of cleaning the level sightglasses for T-701, T-702, and T-703 without taking the separators out of service.

This project is included in the 1FQ91 Capital Budget. This project will be reviewed during the 1FQ91 Capital Budget project review meeting.

If there are any questions or comments, please contact me at extension 3561.

Anthony S. Deanes
Summer Process Engineer
