LIST OF ATTACHMENTS SENT TO MR. THOMAS WITH 2-13-76 LETTER

No.	Date	Author	Abstract of Letter
1	2/9/70	Olsen	Customer alert on PCB enviro-problems for A-1254 & 1260, include Pydraul 625, AC, AC Winter Grade, 540 and FR-3 and certain dielectrics. Other products listed do not contain these Aroclors (54% & 60% Chlorine.)
2	6/11/70	Johnson	Refers to February letter. Pydrauls reformulated do not contain 54% & 60% chlorine PCB's. New formulations available within next 90 days when warehouse inventories are depleted.
3	8/27/70	Johnson	Refers to 2/70 letter. Pydraul F-9 reformulated to Pydraul F-9A contains no PCB. During the next 90 days as warehouse inventories deplete new orders will be filled with new formulation.
4	2/1/71	Bradford	Lists Pydrauls containing PCB's and new Pydrauls containing no PCB's. As old inventory is depleted and warehouses drain next 60 days, new formulations will be shipped.
5	4/15/71	Bradford	Refers to previous letters on PCB in Pydraul hydraulic fluid. Reformulations complete and new Pydrauls do not contain PCB's.
6	12/10/71	Bergen	PCB use and avoid leakage statement as acknowledgment to each PCB order
7	1/31/72	Bergen	Effective 6/30/72, all Pydrauls will be reformulated to discontinue use of PCB.
8	2/28/72	Bergen	Refers to letter issued early February (believe this is the 1/31/72 mailing) on Pydrauls reformulated to eliminate chlorinated components. New Pydrauls will be available 4/1/72 and will phase them in by May, 1972. We will write again in mid-March to keep you abreast of our plans.
9	3/15/72	Bergen	New Pydraul products will be in shipment next 30-60 days as present fluid inventory is depleted.
