INTER-COMPANY MEMO

DATE: June 16, 1992
TO: All Supervisors
FROM: A. Zannaras *AZ*
SUBJECT: Switch to New UPS

On Thursday, June 18, the electricians will switch the Computer Power to a new UPS System. The switch is planned to begin at 12 noon and should take approximately one hour to complete.

There should be no disruption of service if all goes as planned. Due to the vulnerability of the Unix files, additional measures will be taken for those systems. Specifically, the IMPAC system will not be available while the switch is being made (less than one hour of interruption).

Thank you for your cooperation and understanding.
