REFERENCE Department Emergency Procedure Plans

TO : N. L. Marsh

Plasticizer Area Emergency Procedures are in the process of being updated with particular emphasis being given to hurricane preparations and designation of the 1976 Emergency Crew.

Currently published plans are fairly up-to-date with these specific items needing attention:

1. Preparation of a separate hurricane plan for Department 53. This will differ little from our "warned shutdown" procedure, with the addition of specific precautions for weather protection.

2. Review of oxo shutdown plan vs. cold box shutdown plan to insure no inconsistencies.

3. Inclusion of more specific procedures to isolate control houses in case of a toxic gas spill.

4. Updating organization charts.

5. Overall review to reflect procedure changes and equipment changes since last publication (1972 to 1974).

This will be completed, at least in draft form, by August 30.
