PLAINTIFF'S EXHIBIT

GP-1458

I feel that you have a valid viewpoint in that, although we may at our plants be able to live with the OSHA standards on asbestos, it is extremely doubtful that our customers can live with this at the job site. If and when OSHA does start a vigorous enforcement program, this will force the market to an asbestos-free product; we should continue to actively develop our asbestos-free Ready-Mix to meet this situation when it arises.
