COMPANY CONFIDENTIAL

W. J. Wilson

A. Aroclor - Quality Improvement

Complete the analyses and evaluate the extent of quality improvements available from the June plant demonstrations. Get a charge number and clearance to ship test material to Electric Utilities for life testing. Complete 30% of the rate and quality studies with the laboratory continuous chlorinator. Meyer, Gloeckner, Werner, Raterman.

B. DeNora Cells - Change in KCl Specification

Meter bromine into the next Aroclor 1242 run (EDC 7/10-14) and monitor for quality changes or variation as found by laboratory studies. Make a material balance for bromine on one of the DeNora cells. Gloeckner - All month.

C. PNA/ONA - New process

Complete the stability studies and support work on ONA. Garabedian - All month.

D. 2,4-D and Related products - New Plant, Potential G.T. $250M/yr.

Evaluate possible new catalysts for CAC (by 7/15 for a preliminary study). Evaluate the feasibility of making higher assay DCP and MCA. Essentially complete the kinetics of the condensation reaction. Zazaris, Harris, Carlson, Hug - All month.

E. Santolube 493 - Filter Wash Study, Potential >$20,000/yr.

Provide analytical back up for an oil wash of the existing filters. Raterman - Part time all month.
