Dr. Harold Holden
BICC Limited
P. O. Box 1
Prescot L34 5SZ
Merseyside, England

Dear Harold:

Enclosed are copies of the two slide presentations for the studies of General Electric capacitor workers with high PCB exposures. A full text is not available, however, General Electric scientists have presented the material contained here at several scientific meetings (public and private) in the U.S.

The full text is scheduled to be published in the proceedings of the recent PCB symposium held by NIEHS (National Institute of Environmental Health Sciences) at Research Triangle Park, North Carolina, in September of this year.

I enjoyed meeting and visiting with you at the meetings in the Netherlands. I hope this material will be of value to you.

Sincerely,

John H. Craddock/dg
