January 22, 1953

SUBJECT: OUTLINE OF L. I. A.
PROJECT NO. 20

To Members of the Red Lead Technical Committee:

Enclosed is the outline for Project No. 20 on Vinyl Metal Conditioners and Anticorrosive Primers. This project has been put off for several months but Mr. Lominska has informed me that he will probably be able to fit the preparation of the panels into his schedule in the very near future.

This project will be reviewed at the next meeting of the Red Lead Technical Committee on February 13. By that time I expect that Mr. Lominska will have begun the preparation of the test specimens.

Very truly yours,

C. J. Vander Valk
Technical Director
Pigments and Chemicals Division
