Cranberry Station
East Wareham, Massachusetts 02538

Dear Dr. Deubert:

I appreciate the information you sent me regarding your studies of Aroclor 1260 in fresh water fish and soil. Your information regarding the relative toxicities of Aroclor 1260, Phenochlor DP 6 and Clophen A 60 is similar to that which Professor Van Genderen, University of Utrecht, Amsterdam Holland, discussed with us last May. You or your colleague may wish to compare notes with Prof. Van Genderen.

I have arranged for a sample of Aroclor 1254 which is being sent to you under separate cover. If you find you need more samples, don't hesitate to request them.

Sincerely,

W. B. Papageorge
Manager
Environmental Control
