Mr. H. L. Sklar
Industrial Condensers Corp.
3243 North California St.
Chicago, Ill. 60618

Dear Mr. Sklar:

Thank you for your call to discuss the continued availability of our dielectric Aroclor fluids for capacitor applications.

We are asking our users of these fluids to avoid disposing of them in a manner that will result in environmental pollution. They are stable, long-lasting polychlorinated biphenyls (PCBs) which are not easily degraded under natural conditions.

Consequently we have established a disposal method at our plant in Sauget, Ill. The charge for this service is $.03/lb. of material delivered to our plant. I am attaching a label which should be placed on each container sent to us -- it carries shipping instructions. If you plan on sending us scrap Aroclor then please advise the numberoof labels you will require and I will send them to you.

Sincerely,

J. R. Fallon
