AROCLOR 1016

R. Kuster - 1740
Dr. R. H. Munch - 1760
C. Paton - B2SC

1740
R. McCutchan

As Marketing does not have copy of the official specification for Aroclor 1016 and as this is long overdue and needed, please forward such.

This official specification for Aroclor 1016 is to be written similar to the enclosed official spec formerly used for Aroclor 1242.

With reference to the Quality Control Sheets that Mr. Kuster's laboratory sends to customers, the following two (2) things need to be accomplished:

1. The term "penta" and "hexachlorobiphenyl" need to be changed to read instead "higher boiling homologs"

2. We must add to our Quality Control Sheet the statement that all values given on this sheet are understood to be determined by the methods given in the official Monsanto specification sheet for Aroclor 1016.

Thank you.

P. G. Benignus
