PYDRAUL LABELING

Reference is made to Mr. Smith's memorandum to Mr. Minteer of December 5, 1958. I know that on our label for Skydrol 500 we have a caution reading "CAUTION: Causes skin irritation. Avoid prolonged or repeated contact with skin. In case of contact wash thoroughly with soap and water."

It is my understanding, however, that Pydraul does not present the same problems insofar as toxicity is concerned as Skydrol 500. Will you please tell me about the toxic properties of Pydraul so we can be sure that we are using proper caution statements on our labeling.
