Rob and all:

Good idea.

He is also chairman of the department that includes Gary Marsh.

Bette -- I would like to add the name of Howard Rockette from the University of Pittsburgh to the list. Howard is a biostatistician, who currently sits on the HEI scientific committee, and the science advisory committee of the benzene shanghai health study. I think Howard will add some key insights on regression modelling -- a key issue in interpreting the UAB data. He is a broad thinker and good communicator.

Current Peer Review List

Attached is the current list of peer review nominations. Please review and let me know if you have any additions (or I missed anything). For some individuals I have only a name. If no additional information appears, I also could not find them by a google search. If we want these folks to be seriously considered, we might want to provide contact information.
