copies sent to LHH + WB for reply.

Dear Sirs:

As a graduate student in Environmental Biology, I am analyzing fish for the presence of pesticide residues. I would be greatly appreciative if you would send me small quantities of the compounds Lasso and Ramrod and the mixtures of the Aroclor series 1242, 1248, 1254, and 1260 (perhaps a gram or two) of sufficient purity for use in gas chromatographic standards.

LHH

WB P

I am under the advisement of Drs. James E. Brower and K.V. Prahlad.

Thank you,

Clyde Robert Wilson
