Gentlemen:

It has been my intention for some time to communicate with you regarding an inquiry thatI would like to make relative to a newspaper story in the Globe Democrat appearing early in December. This article dealt with a chemical substance referred to in the article as "PCD". — PCB I note that the statement was made by your representative that the majority of this substance was used in "closed system electrical uses". Could I impose on you to advise me what a "closed system electrical use" is. It occurs to me that this may be an electric transformer but I am totally uncertain and would very much appreciate this information. I enclose a self-addressed stamped envelope for your convenience in that connection. Thanking you, I am,

Yours very truly,

Paul F. Niedner
