Dear Dan:

Enclosed is a list of 35 Monsanto employees who are in the Northwestern/ Monsanto health study and for whom you need a telephone number. I sent this list to the salaried personnel representative at the Krummrich plant and she was able to provide us with a few telephone numbers. I cannot attest to the accuracy of these telephone numbers, since the plant does not maintain contact with the employees once they cease employment with the Monsanto Company. However, it may be a start in locating some of the employees in this group.

As always, please give me a call if you need some assistance.

Sincerely,

Terry L. Leet
