

1 People thought we are all right. It is a
2 rare disease, even among people who work with
3 asbestos. These men were the unfortunate ones. No
4 doubt about it. But most people who do never get
5 diseases. The association took place.

6 This association came later, and to this day
7 there are some people who still dispute whether it can
8 or can't.

9 The reason I say this is because Kaylo, as
10 they admit it, contained this, and not that.

11 Pardon me one second.

12 I am running short for time. Just a few
13 closing comments before I sit down because I won't get
14 to talk to you until the end of the trial.

15 That is basically what we know.

16 What is important to know is 1972 Owens-
17 Corning stopped making Kaylo that contained asbestos.

18 What happened after this guy got sick in the
19 late '60s, we started an effort to replace asbestos in
20 Kaylo; and in 1972, we were granted a patent by the
21 Patent Office in D.C. for this new asbestos-free
