statute, rule or regulation, and if so, set forth the applicable statute, rule or regulation;

(n) If the testing or inspecting was done in order to conform with any standard of the industry, and if so, set forth what that standard was, and the name and address of the person or entity who promulgated each such standard and the dates that it was first promulgated or subsequently amended; setting forth the language of any amendments;

(o) The name and address of any governmental agency to whom the results were reported or communicated;

(p) The reasons for any communication to any governmental agency, setting forth a copy of all communications to or from any governmental agency regarding air-quality;

(q) The name and address of the facility where each such test or inspection was performed;

ANSWER: Bendix did not directly conduct any such tests or inspections prior to the date of decedent's last occupational exposure to asbestos. However, in 1973 Bendix Research Laboratories received a contract from the Environmental Protection Agency to study brake and clutch emissions during vehicle operation. Included in that study were products obtained from a number of manufacturers. The results of the study were published in SAE paper No. 730548, "Brake and Clutch Emissions Generated during Vehicle Operations". The EPA study is mentioned in this answer solely for informational purposes and without particular reference to the Interrogatory or its subparts.

57. State whether defendant has ever conducted any study or test or had tests or studies conducted on its behalf regarding asbestos exposure sustained by auto mechanics and/or auto salespersons who work upon asbestos automobile parts, or who are in the vicinity of the area where such work is performed; and/or upon the effects of
