Tom, my International #3 Run shows only a few sales of PCB fluids outside the U.S.A. They are as follows:

Santovac 1	Sales, 11/71
Monsanto Canada Ltd.	1,200 lbs.
Santovac 2	
Peru	
El Dorado Metalizacion	60 lbs.
Transworld Electronics	120 lbs.
Monsanto Brazil	
Monsanto Comercio E Indust.	960 lbs.
Monsanto Canada Ltd.	1,500 lbs.

My suggestion for a plan to get out of this business by January 31, 1972 is simply to ask Bill Hayden to accept no orders for shipment of either Santovac 1 or Santovac 2 for after January 31, 1972. If we have orders but they for some reason do not ship before January 31, then I would ask Bill to make sure that they do not ship at all.

In terms of notifying the customers, I would suggest that Frank Camargo and David Goodwillie advise the customers that we will no longer supply this fluid and that they should contact their vacuum pump or diffusion pump manufacturer for his suggestion as to a replacement fluid.

Unless I hear from you or one of the other recipients of this memo, I will assume that this is satisfactory and that this is the plan we will follow.
