Lee Young, engineer 4196 Pgh

1/18/78

Carbon baking fce firing manifolds 600-800°F with occasional flame impingement

JM 88 Firewall Sheet - asbestos cloth bonded w neoprene.

(Young) He will talk to Cap and one of them will let me know wh there is a possible alternate.

These are in use in quantity @ Tenn and Rockdale.

Caprio says no alternate currently available.
