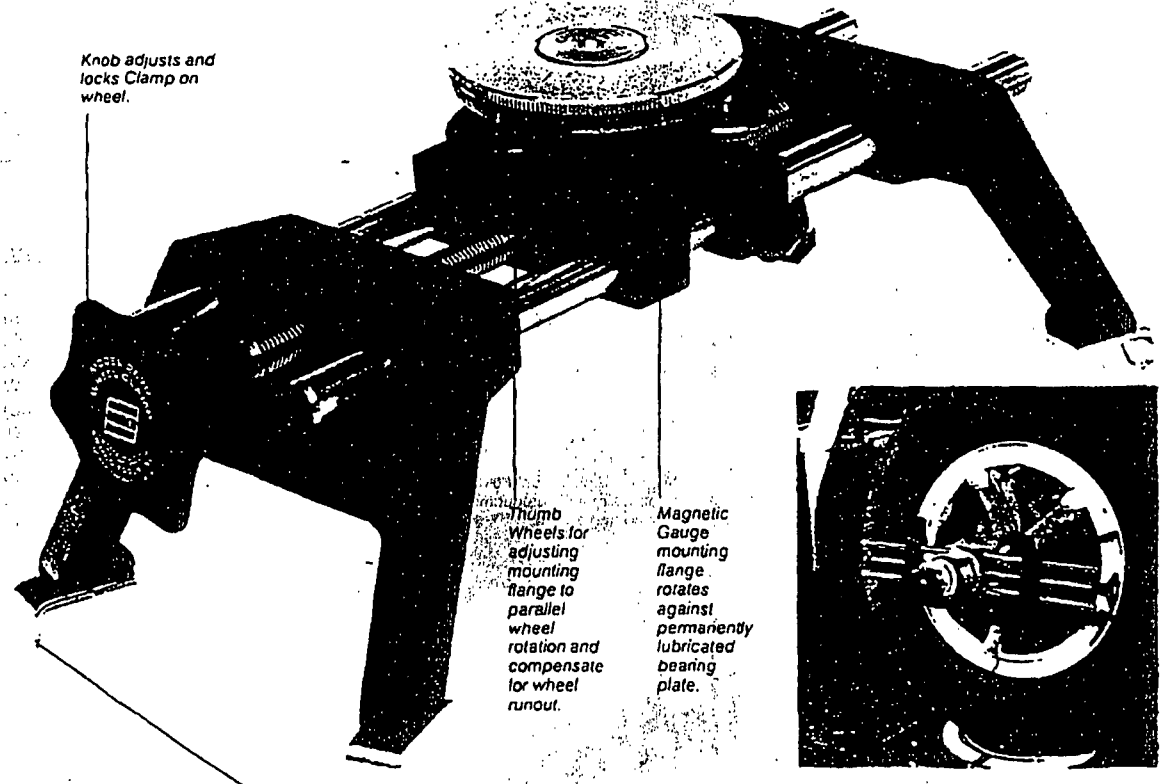
Wheel Clamps

Model 2670 Passenger Car Wheel Clamp

Many types of wheels—wire, styled magnesium, etc. do not accept magnetic alignment gauges. For these wheels, use AMMCO Wheel Clamps. Easily mounted. Will not mark wheels. Fit all 12" to 16½" (305 to 419 mm) wheels. Actual range: 12⅜" to 17¾" (314 to 450.8 mm). Thumb wheels permit adjusting the Gauge mounting flange so alignment gauges can be mounted precisely parallel to the plane of rotation of the wheel assembly about the spindle. NOTE: 2 Wheel Clamps are required when using the AMMCO Trac-4 or Model 2610 Gauges.

Ship. Wt. of each clamp 12 lbs. (5.4 kg)

Model 2670 Wheel Clamp with a Model 2620 Trac-4 mounted. Clamp's four hooks take a secure grip on the wheel rim.



Model 2675 for Truck Wheels

Fits all 15" to 24½" (381 to 622 mm) diameter wheels. Actual range: 16" to 29¾" (406 to 755.6 mm). Has all the features of Model 2670

Ship. Wt. each clamp 14 lbs. (6.35 kg)
